

## Notes on implied line and shape (continued)

Example sheet—

Work with line and shape to explore variations

The grid contains six variations of a stylized human figure, arranged in three rows and two columns. The top row shows solid black figures with implied lines. The middle row shows solid black figures with explicit lines. The bottom row shows outlined figures with implied lines. A vertical line with two small squares at the bottom is on the left side of the grid.

Once you have completed the above exercise choose one or two that are working best and photocopy that to a larger and smaller scale so that you can test how well the symbol will function within
