**Web Story**

**Objective:** To gain a basic understanding of content development, story telling, way finding, file preparation, file organization and coding for the web.

**Process:**
1. Using a classic short stories found on http://members.lycos.co.uk/shortstories/ develop content for your site that delivers the overall message of the story. It is not required to use the original text of the story in its linear progression. Site should address sequencing and meaning through altered way finding. Also consider additional information that can enhance the message.
2. Site must have a minimum of five pages and links throughout.
3. Create a paper story board and flow chart (site map).
4. Prepare images to use for the site.
5. Organize files and folders for the site.
6. Implement content (images and copy) into Dreamweaver
7. Post site on server!

**Schedule:**

**Monday, 4/5**
—Activate personal web space http://www.spu.edu/cishelpdesk/web/personal/

**Monday, 4/12**
—Choose story http://members.lycos.co.uk/shortstories/
