Style Guides

**Objective:** To develop a graphic system which provides the designer with clear information regarding standards of navigation, space allocation, fonts, colors and imagery. This system helps the designer communicate a cohesive design direction. The graphic standards developed for the site allow a team of designers to implement future content, while maintaining the original design aesthetics.

**Project:**
Create the following screens with descriptions of how the following will function throughout the site.

— Font and Color System
— Grid System
— Icon and Imagery
— Page Template (including on/off navigation)

**Due Date:**
Create gif and jpeg images from Illustrator or Photoshop Files, place into HTML pages and post to your website and present Monday 5/17
